**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-7 and 9-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record neither shows nor suggests the claimed subject matter including an expanding method comprising an expansion maintaining step of maintaining an expanded state of said adhesive sheet with the spacings between individual chips unchanged and with said plate-like article remaining mounted to said frame after said expanding step by nipping or pinching a loose part of the expanded adhesive sheet formed near an outer periphery of the adhesive sheet by the expansion of the adhesive sheet to form a looped annular protrusion surrounding the chips. The closest prior art of record, U.S. Patent No. 6,344,402 to Sekiya, discloses a method of dicing a workpiece, including a conveying step of conveying said plate-like article (W) together with said chuck stage (21) of said dicing device to a different area in said dicing device without being detached from a chuck stage after the dicing of said plate-like article; an expanding step of expanding said adhesive sheet so as to produce spacings between individual chips with said plate-like article being mounted to said frame (F) in a wafer spreader of an expansion device; and an expansion maintaining step of maintaining in a maximally expanded state of said adhesive sheet with the spacings between individual chips unchanged and with said plate-like article remaining mounted to said frame after said expanding step by gathering the expanded sheet formed near an outer periphery of the adhesive sheet by the expansion of the adhesive sheet to form

an annular protrusion surrounding the chips by nipping and securing the annular protrusion, and conveying said plate-like article from the wafer spreader of said expansion station together with said frame with the increased spacings between said chips being maintained (column 3, line 55-column 4, lines 43; See Figures 8-9). However, Sekiya does not specifically disclose forming a loose part or the recited expansion maintaining step of maintaining an expanded state of said adhesive sheet with the spacings between individual chips unchanged and with said plate-like article remaining mounted to said frame after said expanding step by nipping or pinching a loose part of the expanded adhesive sheet formed near an outer periphery of the adhesive sheet by the expansion of the adhesive sheet to form a looped annular protrusion surrounding the chips, nor is there any obvious reason to modify Sekiya to include such a step. Therefore, claims 1-7 and 9-20 are found to distinguish over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
